

Tox Design Group uses best-in-class LC-MS/MS technology to bring you precise quantitative testing with the utmost attention to compliance & control, through customized in-office laboratory services.

Tox Design Group

www.toxdesigngroup.com

Tox Design Group is the premier expert in starting new toxicology physician office laboratories (POLs) and reference laboratories. We can start your laboratory more quickly, cost effectively, and efficiently than our competitors. We require no lengthy contracts and no upfront fees. Our Consultants are professionals navigating CLIA and state regulations. We offer a seamless process to ensure your laboratory is effectively operating without issues.

Our team of laboratory and healthcare professionals has identified pain management, internal medicine and other specialty physicians as ideal candidates for onsite physician office laboratories (POLs) and can lead the way in **helping your practice personalize care and improve profitability.**

Tox Design Group uses a complete Quantitative Laboratory System utilizing **Liquid Chromatography Tandem Mass Spectrometry (LC-MS/MS).**

LC-MS/MS is rapidly increasing in the clinical toxicology field and has become the analytical technique of choice for highly complex, quantitative drug abuse testing. The resolving power of chromatography combined with the sensitivity and selectivity of mass spectrometry results in an extremely useful analytical technique.

Benefits:

- Minimize potential for errors
- Improved detection and quantitation
- Ability to test for 100 substances and metabolites
- Fully customizable- ability to quickly add new substances and develop new methods
- Reduced sample preparation and handling; improved detection limits; and faster analytical run times.

Tox Design Group Services Include:

- A best in class Quantitative Laboratory System utilizing Liquid Chromatography Tandem Mass Spectrometry (LC-MS/MS)
- Lab design, installation, maintenance, and ongoing operations of the POL
- All laboratory equipment and supplies
- Licensed Technologist, Lab Director, and Lab Supervisor recommended by Tox Design Group
- CLIA Certification "Highly Complex"- COLA Accreditation- compliance- proficiency testing
- Billing management solution

**Per state and federal guidelines*

Tox Design Group counsel is available to consult with customer's counsel.

Full Business Service Solutions

The installation and application of a LC-MS/MS POL is a complex venture that demands an investment in personnel, infrastructure, compliance, and technical savvy. Tox Design Group performs a detailed evaluation of the client group's existing practices and, in conjunction with the providers & their teams, generates a panoramic POL strategy at minimal upfront expenditure. A POL producing quantitative results empowers providers to better regulate therapeutic drug oversight and make individualized treatment determinations. Please contact a Tox Design Group representative for a personalized proposal, drawn specifically for your practice, and any additional information you may require.
